DETAILED ACTION

Status of Claims

1. Receipt of the Response filed January 27, 2005 is acknowledged. Claims 1-57 are pending in the application and are presented to be examined upon their merits.

Response to Amendment

2. The affidavit filed on June 21, 2004 under 37 CFR 1.131 is sufficient to overcome the Postrel reference after consideration of the decision on petition filed July 26 2005

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-57 rejected under 35 U.S.C. 103(a) as being unpatentable over MyPoints.com (www.MyPoints.com) in view of Auction-Anything.com (www.auctionanything.com)

AuctionAny.com discloses a method of conducting a customer affinity program auction and teaches all the limitations of the current application except for the exchange rate for reward points and the purchase of reward points on a floating basis. MyPoints.com has these features on its website (see www.MyPoints.com website). Since AuctionAny.com allows customization of

its points-based auctions, it would have been obvious to provide the notoriously old and well known exchange rate of points as well as floating mechanism as convenient (if not necessary) features for customers using the points based auction. For example, a customer would want to know what the exchange rate between points and currency. Also it would be convenient for customers to float the purchase of points so as to allow time flexibility for the customer. Thus such features would have been obvious expedients well within the field of the art.
